

## CANDIDATE INFORMATION

### Lorraine Otero

My name is Lorraine Otero. My husband and I have lived in this beautiful and peaceful community for about four years. I see all the great things the volunteer Board has worked hard to accomplish for the good of the community and I would like to be a part of that positive action.

### John Fredlund

My name is John Fredlund. I am volunteering to help continue the progress of the current board. I have lived in Sierra Los Pinos for 13 years, been with La Cueva Volunteer Fire Department for 12 years, and am currently the Lieutenant for the Sierra Los Pinos station. I retired from the National Nuclear Security Administration 18 months ago. Though being actively retired and having almost no free time, I believe the community needs people on the Board that will help maintain and improve the valuable assets of our community.

### Judy Kilburg

I've lived in Sierra los Pinos for 30 years. During my early years, I served on the Board of Directors for almost 12 years holding positions as secretary, treasurer, vice president and president. Since returning to the board, I've served as roads chairperson, president, and most recently as treasurer. The Board has been working very hard to stay in compliance with all regulations, making improvements, and trying to bring the community together. I would like to continue being involved with the Board and believe I can continue to offer my knowledge and experience as we all strive to maintain Sierra los Pinos as a community we can all be proud of.

### Harold Corn

SLPPOA long-time resident (moved here in 1975).  
Charter member of SLPPOA.  
Early member of SLPPOA Board of Directors.  
Retired from LANL (33 years, 9 years as contractor).  
Raised two children while living in Sierra Los Pinos.

My motive for returning to the SLPPOA Board of Directors is to assist with difficult water, roads, and legal decisions. I have served as a water volunteer for many years, including the meter can special assessment multi-year project and the very recent System 1 main line pipe replacement plan. I believe in community involvement, commitment, and a volunteer spirit.
