

**Community public water system certification for systems that do not serve any schools or childcare facilities within their distribution**

All Community public water systems must conduct directed public education and lead monitoring at the schools and child care facilities they serve and provide a list of these facilities to the State in accordance with 40 CFR 141.92<sup>1</sup>.

If you are a Community public water system and has investigated and concluded that, in good faith effort, your system does not serve any schools or childcare facilities, then the system does not have to submit the required school and childcare facilities list. Community systems that do not serve these facilities must instead fill out and sign this certification form.
